

Maintenance & Cleaning Advice - Seal

Your floor has been professionally sanded and finished with specialist lacquer.

**** We recommend only minimal foot traffic after 8 hours of the seal being applied. Substantial wear should be avoided for at least 72hours. Please avoid the use of detergents and polishes etc. for at least 5 days after the seal has been applied.**

Please do not place heavy furniture or floor coverings (rugs etc) on the floor for the first 8 days as the floor needs to fully cure or you may risk marking the floor. **

Cleaning tips:

- ◆ We recommend soft broom or vacuum attachment is used to remove surface dust and dirt.
- ◆ To wash the floor always use a suitable cleaner and a damp mop (rinsing regularly). Please ensure the water is not too hot and you do not flood the floor.
- ◆ We never advise wax based products are used on the floors which we seal.

Some handy tips:

- ◆ Fit all furniture with felt pads, in particularly chairs which will be moved regularly. For items with casters please consider using caster cups.
- ◆ Heavy items should always be lifted not dragged across the floor.
- ◆ Stiletto heels will damage the floor so we advise they are either covered in specialist heel stoppers or not worn at all on the wooden surface.

Ongoing care:

- ◆ To maintain your floor to a high standard, we advise that your floor is professionally re-sealed periodically. We would encourage you to contact us for guidance, we are happy to offer free no obligation advice.
- ◆ Please visit: www.headingtonflooring.co.uk or call Andy 07974 641234 / Michael 07757 543967.
